DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on April 21, 2005 has been entered.

Information Disclosure Statement

The information disclosure statement filed April 21, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to the **NON PATENT LITERATURE DOCUMENTS** have not been considered. No copies of the non-patent literature documents have been received.

Allowable Subject Matter

Claims 1-7,10-16,18,20-22,24,26-30 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited prior arts alone or in combination discloses the claimed laser with the recited limitations of independent claims 1,16,22,28,29 and 30.

Application/Control Number: 09/848,914

Art Unit: 2828

Regarding claims 1-7,

None of the cited prior arts discloses or suggest in particular having at least one of the frequency or the amplitude of the tuning circuit selected to increase the coupling efficiency of the optical beam by spreading a line width of the optical beam.

Regarding claims 16,18,22 and 23,

None of the cited prior arts discloses or suggest the recited limitations in particular having filtering the optical beam to exhibit a first set of passband aligned with corresponding channels and tuning the optical beam to at least a selected one of the first set of passbands.

Regarding claims 10-15 and 28,

None of the cited prior arts discloses or suggest the recited limitations in particular having a grid generator to generate a first set of passband aligned with the center wavelength and a channel selector to select the channels to tune the optical beam by generation and tuning of at least a second passband with the first set of passband.

Regarding claims 20,21,26,27,29 and 30,

None of the cited prior arts discloses or suggest in particular having modulating the optical path length at a frequency selected to increase the threshold for Stimulated Brillouin Scattering (SBS) in the optical coupling of the gain medium with an optical fiber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 2828

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
